A project selection process that is strongly linked to strategy results in:

Select one:

- ☐ a. The most profit.
- ☐ b. A larger and more diverse organization.
- ☐ c. Stronger core competencies.
- ☐ d. More projects.
- ☒ e. Better utilisation of the organisation's resources.

Your answer is correct.

Without integration of projects with the strategic plan, resources are poorly utilised. Conversely, organisations that have a link of projects to strategy have more cooperation across the organisation, perform better on projects and tend to have fewer projects.

The correct answer is: Better utilisation of the organisation's resources.

At the project level, which of the following is a factor that should influence the choice of project management structure?

Select one:

- ☐ a. The size of the project.
- ☐ b. The novelty of the project.
- ☐ c. Budget and time constraints.
- ☐ d. The strategic importance of the project.
- ☒ e. All of these are factors that should influence the choice of project management structure. ✓

Your answer is correct.

At the project level, seven factors should influence the choice of project management structure. They are the size of the project, the strategic importance, the novelty and need for innovation, the need for integration, the environmental complexity or the number of external interfaces, budget and time constraints, and the stability of resource requirements.

The correct answer is: All of these are factors that should influence the choice of project management structure.

Which of the following is NOT true regarding organizing projects within a matrix arrangement?

Select one:

- ☒ a. Its flexibility supports a strong project focus that helps alleviate stress among project team members. ✓
- ☐ b. It is designed to optimally utilize resources by having individuals work on multiple projects as well as being capable of performing normal functional duties.
- ☐ c. There are usually two chains of command.
- ☐ d. It is a hybrid form of organization that combines characteristics of both dedicated project teams and functional organization.
- ☐ e. Provides a dual focus between functional/technical expertise and project requirements that are missing in either the project team or the functional approach.

Your answer is correct.

It is true that a matrix arrangement supports a stronger project focus; however, this arrangement is also very stressful for team members due to the fact that they are reporting to two managers.

The correct answer is: Its flexibility supports a strong project focus that helps alleviate stress among project team members.
